HARI ANANT TIWARI

SOFTWARE ENGINEER | BACKEND · FULL-STACK · AI ENGINEERING

+91 8448557926 · hari.anant777@gmail.com · linkedin.com/in/h4tz · github.com/h4tz
Noida / Delhi NCR · Remote · Immediate Joiner · Open to Full-Time Roles

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of professional experience across frontend, full-stack product engineering, backend systems, and AI automation. Built real-world solutions for marketplaces, healthcare, construction, and content workflows—from React interfaces and Django APIs to enterprise integrations and AWS event-driven services. Focused on efficient delivery, maintainable architecture, and performance, including approximately 40% lower API latency through workload offloading.

TECHNICAL SKILLS

Languages & Frontend: Python, TypeScript, JavaScript, SQL, React, Next.js, HTML/CSS
Backend & Integration: Django, DRF, FastAPI, REST APIs, OAuth, JWT, Webhooks, Django Channels, WebSockets
Cloud & Data: AWS Lambda, API Gateway, EventBridge, S3, RDS, CloudWatch, PostgreSQL, Redis, Celery, Docker, Git
AI & Automation: LLM APIs, AI content workflows, PDF parsing, structured extraction, human-in-the-loop pipelines

PROFESSIONAL EXPERIENCE

AI Engineer | Palcode.ai — May 2026 – Jul 2026

- Built an AI-assisted research-to-WordPress workflow that generated structured drafts from source documents/topics and supported human review before publishing.
- Developed authenticated FastAPI integrations with DrChrono for patient, provider, office, appointment, and scheduling workflows.
- Implemented Procore OAuth/project-data workflows and PDF extraction pipelines to convert external and unstructured data into usable records.

Backend Developer | PyCray — Oct 2025 – Mar 2026

- Developed Django/DRF APIs with JWT authentication, PostgreSQL workflows, Redis caching, and third-party integrations.
- Offloaded compute-intensive tasks to AWS Lambda, reducing API response latency by approximately 40% for affected operations.
- Containerized services with Docker and supported AWS event-driven workloads and CloudWatch-based troubleshooting.

Full Stack Engineer | Dakshit Dolphin Designer Pvt. Ltd. — Nov 2024 – Oct 2025

- Built a two-sided Django/PostgreSQL marketplace for businesses and advocates, including onboarding, listings, matching, and optimized data access.
- Implemented real-time updates with Django Channels/WebSockets and Razorpay/Twilio webhook-driven payment and messaging flows.

Frontend Developer (Intern → Full-time) | CODTECH IT SOLUTIONS — Jan 2024 – Oct 2024

- Progressed from intern to full-time developer; delivered reusable React/TypeScript interfaces, REST API integrations, responsive layouts, and form/error handling.

SELECTED PROJECTS

MeterPay | Java Backend Flagship | In Progress
Usage → Metering → Billing → Payment. Building toward Java 21 / Spring Boot services with Kafka event processing, Redis, PostgreSQL, and payment workflows.

LaunchForge | Infrastructure Flagship | In Progress
Git → Build → Deploy → Scale → Observe. Building toward a delivery platform with Docker, Kubernetes, Terraform, AWS, Traefik, Prometheus/Grafana, and OpenTelemetry.

AI Content Automation Pipeline | Palcode.ai | Delivered
Built a document/topic-to-WordPress draft workflow integrating AI research, structured generation, automated draft creation, and human review.

EDUCATION

B.Tech, Computer Science | Jaypee Institute of Information Technology, Noida — 2021 – 2025
